EDUCATION

B.Tech IT - Mahendra Engineering College   Namakkal, Tamil Nadu
CGPA: 7.98 / 10   *Aug 2020 – Jul 2024*

EXPERIENCE

Web Developer Intern   Oct 2022 – Present
EKA HR Consulting Pvt Ltd   *Namakkal, Tamil Nadu*

- Gained hands-on experience building and customizing WordPress websites using Divi, Elementor, and Oxygen Builder.
- Designed user-friendly, responsive layouts, optimized site performance, and implemented SEO strategies to improve search engine visibility.
- Collaborated with the team to enhance site functionality, troubleshoot issues, and ensure smooth user experience.

Full Stack Web Developer Intern   Apr 2022 – Aug 2022
ITKrish Technologies   *Namakkal, Tamil Nadu*

- Developed web applications using Laravel, employing MVC architecture, Blade Templating Engine, Eloquent ORM, and robust routing.
- Integrated RESTful APIs for enhanced functionality, utilizing Laravel Middleware for secure data flow.
- Managed database migrations and automated tasks with Laravel's Artisan CLI, ensuring efficient deployment and implementing authentication mechanisms for data security.

PROJECTS

Point of Sale | *React, Redux-Persist, Bootstrap*   Oct 2024 – Oct 2024

- Built a POS system using React with real-time inventory management and seamless transaction processing. The system simplifies adding items to the billing table and calculating totals efficiently.
- Designed a user-friendly interface with detailed sales reporting to track performance and inventory. The reports offer valuable insights, helping businesses make informed decisions.
- Live Link: pos-react.netlify.app

Oppo E-Store | *MERN stack*   May 2024 – Jun 2024

- Developed a high-performance, responsive eCommerce application for Oppo mobile phones using ReactJS for a dynamic front end, and a robust backend with Node.js and Express.js for secure, efficient data handling and API integration.
- Optimized MongoDB for seamless data storage and retrieval, ensuring scalability and an enhanced user experience.
- GitHub Link: github.com/prakash-200/OPPO-ECommerce

Netflix Clone | *Angular, Typescript, Bootstrap, Firebase API*   Oct 2023 – Nov 2023

- Developed a Netflix clone web application using Angular, creating an interactive and dynamic user interface that closely mimics the original platform, with responsive design principles implemented using Bootstrap.
- Integrated Firebase API for secure user authentication and session management.
- GitHub Link: github.com/prakash-200/Netflix-Clone
